Personal Achievements

- Renewal technology in the District education secretary of the Engativa locality - Support engineer and auditor of the renovation project. He occupied the first place in objectives proposed by the secretary.

- Development of access control - Own development currently installed in works around the country for construction companies.

- Participation in the digital renewal of the Porvenir pension and severance company, where the digital transformation that was being carried out was supported.

  With my knowledge in agile methodologies I promoted successfully the use of scrum framework to improve the process of development of software in the company.

- Kudos and customer recognizing for great work in successful migration Royal Caribbean web site (AEM 6.2 to 6.4), and one of the best implementations of globalization schema around the world.
