PROFILE

I am very attracted to learning how companies and institutions work and how technology improves the quality of work.

At work, I am proactive and independent, and I like challenges, learning new things, and being self-taught. I have great initiative and the ability to solve problems, always looking for the most effective way to achieve them at the moment. I have a habit of working directly with clients and client teams, advising, defining, budgeting, managing, and building IT solutions. For me, it is nice to have the company's or area's objectives and goals, to deliver my knowledge and energy as focused as possible.
